Summary

I'm a Flutter engineer with 4 years of experience building production-scale **FinTech applications**, with strong experience in Flutter architecture, BLoC, UPI/payment workflows, performance optimization, reusable packages, native integrations and production debugging.

Skills

Languages & Frameworks — Flutter, Dart, (Kotlin, Java, Swift, Js - Basic)

Hybrid & Native Development — Flutter, Android (Kotlin/Java), iOS (Swift)

State Management — Bloc, Cubit, Provider, Riverpod

UI/UX — Dynamic UI, Custom Animations, Transitions, Localization

AI Tools — Claude Code, Chat GPT, Gemini, Kiro, Antigravity

Cloud & Backend — Firebase (Auth, Firestore, Storage, Remote Config, Analytics, Crashlytics), AWS (Cognito, S3), REST APIs (Http, Dio), Socket.IO

Security & Payments — AES Encryption, OAuth2, Stripe, Razorpay

Databases — SQLite, SQLite, Room, Isar, Rowy

Testing — Unit, Widget, Integration (Flutter Driver), Linter

CI/CD & Automation — GitHub Actions, Codemagic, Shorebird, Buildship

Tools — Android Studio, Xcode, VS Code

Version Control — Git, GitLab, Bitbucket, SourceTree

Project Management — JIRA, Trello, ASANA

Others — FlutterFlow, Google APIs, Gradle

Academic Credentials

Bharath Niketan Engineering College, B.E ECE

01/2020 – 12/2020 | Theni, Tamil Nadu

GPA: 7.4

Work History

Flutter Developer, Alchemy Techsol India Pvt Ltd

08/2025 – Present | Bengaluru

ABCD Payments (Android | iOS)

- Migrated the application architecture from **Provider** to **Cubit (BLoC)**, improving code maintainability, scalability, and state management.
- Revamped the **Device Binding** workflow by implementing **Silent SMS Verification**, multi-SIM handling, and enhanced validation flows for a seamless user onboarding experience.
- Integrated **NPCI-compliant Common Library** features, including **Multi PSP**, **UPI Circle**, and **Hello UPI Chatbot**, enabling secure and automated UPI payment experiences.
- Developed and enhanced **BBPS** payment modules, delivering new features, UI/UX improvements, and critical bug fixes while ensuring compliance with evolving **NPCI** guidelines.
- Collaborated closely with **QA, Product, and cross-functional teams** to deliver production releases, troubleshoot critical production issues, and ensure timely feature delivery.

Executive Software Engineer, Soft Suave Technologies

05/2022 – 05/2025 | Navalur, Chennai

ABCD Super App (Android | iOS | Web)

- Led the migration of a large-scale financial application from **FlutterFlow to Flutter**, upgrading from **Flutter 3.19.5 to 3.24.5** and enabling responsive Web support across all modules.
- Designed a modular, reusable architecture using Flutter packages/plugins, improving maintainability, scalability, and cross-platform development.
- Reduced Web application startup time from **15s to 6s** through asset optimization, deferred loading, and asynchronous initialization.
- Led a team of **7 Flutter developers**, driving code quality through code reviews, custom lint rules, Git workflows, and development best practices.

Weld Configurator (Windows Desktop)

- Developed a Flutter desktop application with **backward compatibility** for seamless migration from the legacy desktop software.
- Built dynamic BLoC-based UI and implemented **AES-256 encryption** with FTDI communication for secure data transfer to industrial welding machines.
- Integrated **AWS Cognito**, REST APIs with retry mechanisms, Firebase Analytics, Crashlytics, Remote Config, localization, and logging.
- Automated CI/CD using **GitHub Actions** and **Codemagic**, while implementing Unit, Widget, and Integration testing.

Native Mobile Applications (Android & iOS)

- Contributed to native Android and iOS applications including **Delytix (Delivery Management)** and **My Charity Change**.
- Worked with **Kotlin, Java, Swift, and Jetpack Compose**, gaining hands-on experience in native mobile development and platform-specific features.

Flutter Plugin Development

- Developed reusable Flutter plugins/packages to accelerate development across multiple applications.
- Experienced in creating, maintaining, and publishing packages to **pub.dev** while following Flutter best practices.
